

Coronavirus Facility Procedures

NEW ENGLAND

THAYER SPORTS CENTER

As the Coronavirus (COVID-19) situation evolves daily, the safety of our staff, tenant partners and customers is paramount. ESG is currently working diligently to be prepared and address concerns.

What is each Sports Facility doing?

In cooperation with local Boards of Health:

- In an effort to be proactive, increasing the rigor of cleaning and sanitizing regimes
- Disinfecting frequently touched surfaces in changing rooms and public areas
- Maintaining full soap dispensers
- Advising even mildly ill employees to stay home

Will events, practices and games still be held?

The ESG team will work with, and follow all guidance and protocols issued by the CDC, and state and local public health departments. We aim to ensure implementation of best practices from these authorities and will proceed with an abundance of caution. However, unless instructed by one of these agencies to close, each facility will remain open, offering all programming as planned. Licensees of particularly components may choose to temporarily suspend operations in their particular leased space, rink, turf, pool or fieldhouse, so please check with each facility component.

General Precautions to Prevent the Spread of Communicable Diseases:

The U.S. Centers for Disease Control and Prevention (CDC) continues to stress general precautions to prevent the spread of communicable diseases:

- Wash hands often with soap and water, for at least 20 seconds;
- Cover coughs and sneezes with a tissue (not with hands), and wash hands immediately after; educate children in this behavior;
- Avoid touching eyes, nose, or mouth;
- Clean and disinfect frequently touched surfaces regularly;
- Avoid sharing drinking glasses, utensils, dishes, towels and other personal items;
- Get plenty of sleep, be physically active, manage stress, eat healthy food, drink plenty of water;
- Stay home when sick; do not send children to school when sick Visit the Centers for Disease Control and Prevention for more information and periodic updates.

NEW COVID-19 CLEANING PROCEDURES

- All “high touch” areas/surfaces need to be cleaned at the end of every day at a minimum. Management/Ownership prefers that they are cleaned twice a shift.
- “High Touch” areas include door knobs, handles and push plates/bars
 - o Light switches
 - o Faucet handles and drinking fountain buttons
 - o Bathroom fixtures (stall doors/handles, TP & PT dispensers, flush buttons and handles)
 - o Hand rails on all stairs o Railings in spectator areas
 - o Elevator buttons and surfaces
 - o Desks, tables and countertops
 - o Chair backs and armrests
 - o Trash can lids
 - o Employee “High Touch” areas
 - Equipment handles (brooms, mops, ect..)
 - Car steering wheel and buttons and levers
 - Trash cart and janitor cart handles

THE MILL WORKS

Dear Members of the Mill Works,

With concerns increasing across the state for potential exposure to the novel Coronavirus (Covid-19), we wanted to take a minute to assure you that your health and safety is of the utmost importance to all of us here at The Mill Works.

We're continuously monitoring the directives of the CDC, Massachusetts Department of Public Health, and the Westford Health Department and Public Schools for this evolving situation.

We're reaching out today to let you know of some of the precautions in place at The Mill Works in an effort to help keep our community safe.

- Hand Sanitization and Fitness Equipment sanitizing stations are located at the front desk, and in the fitness rooms. We have ordered additional stations which we will place throughout the facility.
- Our Facilities team and Newly hired Cleaning Service providers are taking measures throughout the building to ensure additional cleaning and disinfection of frequently

touched surfaces, bleachers, equipment, door handles, faucets, railings, etc.

- We are asking anyone that feels unwell or has come into contact with suspected cases to not enter the building. Please notify us as soon as possible by calling 978-692-8222.

We appreciate your continued adherence to recommended CDC guidelines both in and away from the Facility including:

- Wash your hands often with soap and water for at least 20 seconds, especially after going to the bathroom; before eating; and after blowing your nose, coughing, or sneezing.
- If soap and water are not readily available, use an alcohol-based hand sanitizer with at least 60% alcohol. Always wash hands with soap and water if hands are visibly dirty.
- Avoid touching your eyes, nose, and mouth
- Cover your coughs or sneezes with a tissue or your sleeve (not with your hands)

Please don't hesitate to reach out with any questions or concerns via

email info@millworkswestford.com or phone: 978-692-8222. We will provide more information and updates as they become available.

STARLAND SPORTSPLEX

Starland, as an organization, is watching this situation very closely. We have tripled our disinfection efforts in an attempt to combat this terrible infection. We have installed several more hand sanitizers throughout the building and added signage to remind our customers to wash their hands and cover their coughs. Hourly disinfectant wipe downs are currently in place for the arcade and attractions. We take this matter VERY seriously and want to provide our customers with a safe and healthy atmosphere for sports and games.

BRANDEIS UNIVERSITY

Brandeis University has implemented [a series of new policies in response to COVID-19](#), also known as the coronavirus. These policies include restrictions to international and domestic University-related travel, as well as guidance regarding Brandeis sanctioned events on campus. Effective immediately, Brandeis Athletics will **restrict spectators from attending home athletic events through May 3**. All spectators, including students, staff, parents and alumni, can watch events online via our [live video streams](#), or follow live stats available on BrandeisJudges.com.

Varsity athletic events will continue as scheduled, unless otherwise announced. Visiting teams that are currently scheduled to play at Brandeis are asked to bring only essential support staff in addition to the student-athletes competing. Spectators will not be permitted to attend events held at Brandeis

The Gosman Sports Center is still open regular hours for general recreation and fitness, group exercise classes, intramural sports, and club practices. As always, patrons are expected to wipe down equipment after use and follow all rules regarding health and safety.

The university has set up a [Coronavirus page to view information and updates](#) about COVID-19. Additionally, updates are available from the [Center for Disease Control \(CDC\)](#) and the [Massachusetts Department of Public Health](#).

This decision was made out of an abundance of caution. We realize this announcement will be difficult for individuals who planned to come support our teams this spring. We share in the disappointment and apologize for the inconvenience this will cause to the fans and families of both the Brandeis teams and visiting teams.

As this situation will continue to evolve, fans are encouraged to visit [BrandeisJudges.com](#) in the days and weeks ahead, or follow Brandeis Judges on [Twitter](#), [Instagram](#) and [Facebook](#).

DANA BARROS BASKETBALL CLUB

At, Dana Barros Basketball Club, we take matters of public health very seriously and are closely monitoring the situation as it evolves. We are continuing to look to the CDC for guidance and are actively collaborating with local authorities and industry partners to implement best practices to help ensure the health and safety of our guests. Based on the guidelines provided, we are implementing additional measures, including:

- CDC signage detailing proper hand washing and hygiene procedures installed throughout the gym.
- Signage indicating location of hand sanitizer dispensers.
- Increased cleaning and sanitizing procedures.

We will continue to monitor the situation and communicate updates accordingly.

UNIVERSITY OF NEW HAMPSHIRE:

Please see the UNH Health and Wellness information listed below –

<https://www.unh.edu/health/health-alerts/coronavirus-covid-19>

In addition to this, UNH Campus Recreation has increased our sanitizing stations and disinfectant spray bottles in the building. We've also heightened member awareness with signage in bathrooms and common places.

NEW ENGLAND SPORTS ZONE:

Management has posted signs in the bathrooms and throughout the facility about washing hands, we have hand sanitizer available in the main hallway and we are also in communication with all local schools. We have a lot of students from the local schools that come here almost every day so we are in communication with them so that we will know immediately if there are any issues at their schools, and also that any students that stay home sick from school are not allowed to come to the facility either.

THE RIM:

Health Prevention Policies

Daily Policies Already in Place

1. Disinfect with Lysol/Clorox wipes in all bathrooms daily- Sinks, handles, counters, toilet seats
 - a. During tournaments every half hour
2. Fill automatic hand soap with antibacterial foam soap
3. Disinfect Rim basketball daily
4. Staff sanitize hands after touching basketballs
5. Lysol automatic air dispensers in all bathrooms
6. Disinfect all door handles- entrance, bathrooms, offices, concessions
7. Disinfect all keyboards, mouse and desk daily
8. Disinfect scorer tables, concessions table/chairs & counters
9. Disinfect water fountains daily
10. All floors in the facility (including courts) are cleaned with disinfectant cleaners.

Added Daily Policies

1. Purchased extra Lysol cans/dispensers for main lobby, concessions and front office
2. Have all tournament houses using the Rim do the following:
 - a. Notify all programs that they will need to bring their own disinfectants for players and their equipment
 - b. Notify players/coaches to throw away their own bottles in provided trash bins to prevent spread of germs, during and at the end of games
 - c. Encourage your coaches to disinfect game balls during tournaments
 - d. Encourage players/spectators that have any cold/allergy/flu symptoms to not participate for that event to prevent spreading of viruses
 - e. Encourage customers to wash hands for at least 30 seconds after touching basketballs or shaking hands
 - f. Clean all benches, scorer's tables and chairs after each game with Rim provided disinfectant wipes
3. Add Health Prevention Policies of the Rim on our website
4. Concession area
 - a. All concession employees will wash hand every half hour
 - b. All concession employees will use gloves at all times
 - c. All surfaces will be wipe down every hour

DANVERS INDOORS

We have been monitoring the COVID-19 (Coronavirus) outbreak across the world. We have added a new page to our website with all pertinent information about the virus and protocols that Danvers Indoor Sports will be taking. Any new information will be posted here:

<https://danversindoorsports.com/covid-19-updates/>.

FOREKICKS FACILITIES

At Fore Kicks we pride ourselves in working hard to maintain a clean facility for our customers to help promote a healthy environment. With new information surfacing and the threat of the Coronavirus rising, we are increasing the rigor of cleaning and sanitizing at our facilities.

WHAT WE ARE DOING

1. We are using our in-house cleaning equipment and sanitizing solutions to clean and disinfect high traffic areas and items in the facility more frequently than normal.
2. We are providing hand sanitizer in conveniently located dispensers at the facility.
3. We recommend, out of an abundance of caution, that teams forgo high fives and handshakes between themselves, opposing teams and officials during and after competitions.
4. We are wiping down daily with disinfectant all computer screens and keyboards, door handles, and customer countertops. We also are leaving doors open into our lobby and main facility as much as weather permits to alleviate unnecessary touching of doors.

WHAT YOU CAN DO...

The single most effective way to combat the Coronavirus is to wash your hands with hot water and soap as often as possible. We have restrooms located throughout the facility to aid in this practice and we encourage everyone to use them.

And, if you or your children are sick, please stay home!

We are committed to playing a proactive role to mitigate the spread of Covid-19 and will remain vigilant regarding procedural updates. Your support is necessary and will greatly aid us in providing a healthy environment for our community. Thank you!

[CDC Covid-19 Website Link](#)

NEW YORK

WEST ROCK/CARMEL SPORTS CLUB

We are very aware of your concerns regarding the increase number of cases of the Coronavirus (COVID-19) being reported in our local area. We are working hard to do our party to minimize exposure by cleaning and sanitizing the facility and placing hand sanitizers throughout the facility. There are no plans to close or cancel any activities at this time.

Players and families who have traveled to areas identified by the CDC as significantly impacted by COVID-19 (an up-to-date list can be found [here](#)) or those who have come into contact with an individual who has tested positive for COVID-19 or has a pending test result, should not attend scheduled practice or activities until 14 days of symptom-free self-quarantine have passed.

1. If your child is sick, has a fever or flu-like symptoms, do not send him or her to the Carmel Sports Club.
2. If your child is sick and cannot attend school, he or she should not come to Carmel Sports Club.
3. Please keep your child home for 24 hours after there are no longer signs of a fever or other flu symptoms (cough, runny nose, sore throat, muscle aches)
4. Players should practice good hand hygiene by washing hands for 20 seconds with soap and water before and after all activities.
5. Players should avoid touching their face, eyes, nose or mouth.
6. Please encourage your child to remember to cough and sneeze into their elbow to help prevent the spread of germs, and to wash their hands after anytime they cough, sneeze, or blow their nose.
7. Players should not share drinks or snacks with each other.
8. Please avoid high-fives and handshakes
9. If you are having a birthday party or Event, please advise your guest if their child is sick to refrain from coming.

HOUSE OF SPORTS

We continue to regularly monitor concerns associated with coronavirus (COVID-19) and wanted to take a moment to provide an update as it relates to upcoming HOS activities, including the Learn to Play program, Birthday Parties, Lacrosse Teams, Volleyball Teams, Adult Soccer, Adult basketball and Facility User Groups .

Our top priority, as you know, is the safety of everyone that participates and involved with programming at HOS. We have increased the cleaning and disinfecting of bathrooms, common areas and equipment and added additional hand sanitizers throughout the facility and hand washing soap in the restrooms. We would also like to share the importance that everyone follow the precautionary guidelines below.

- Practice frequent and meticulous hand-washing with soap and water or alcohol-based hand rub
- Avoid touching your eyes, nose, or mouth with unwashed hands
- Cover your nose and mouth when coughing and/or sneezing with a tissue or flexed elbow
- Avoid close contact with anyone with cold or flu-like symptoms
- Quarantine anyone who is sick (players, coaches, parents, roommates)
- Ensure safe food sources; thoroughly cook meat and eggs
- Handshake lines after games will not take place.
- Use individual water bottles; do not share them
- Towels should not be shared in any way

While the coronavirus is without question a significant concern, as of today, all activities at HOS will go on as planned. It is important to note, however, that the situation is fluid and we will provide updates as warranted. For the most up-to-date information, visit www.houseofsportsny.com

It is worth noting that as of today, there are no directives from the CDC to avoid domestic travel, limit large groups or cancel sporting events.

Thank you for your diligence in following the guidelines above and continuing to stay engaged with this important topic.

HACKLEY

Hackley's standards for those who have travelled to a country that is designated as a Level 3 or Level 4 according to the [US Department of State](#), is that you must be back in the United States and asymptomatic for 16 days before entering the Hackley campus. The definition of each level is noted below:

- Level 1: Exercise Normal Precautions
- Level 2: Exercise Increased Caution
- Level 3: Reconsider Travel
- Level 4: Do Not Travel

The same restriction (asymptomatic for 16 days before entering Hackley campus) applies if you have been in contact with anyone who has the Corona Virus.

Hackley has also changed protocol to now clean facilities thoroughly right after games as opposed to waiting until the next day. We are also exploring a more detailed cleaning process.

AMBC2/Hardscrabble Club:

At AMBC2/Hardscrabble Club, we are monitoring the global Coronavirus (COVID-19) outbreak very closely and following the guidance recommended by our government, the CDC and health officials.

We are taking a proactive approach and reminding all our employees to adhere to [hygiene protocols and best practices](#) in and outside the club.

The health and safety of our players, employees, coaches and parents is our number one priority.

Mount St. Vincent:

The College is closely monitoring the outbreak of COVID-19 (novel coronavirus). The health and wellbeing of our community remains the top priority. The College has monitored and will continue to follow all public health advisories and guidance.

[Click Here](#) for updates and communications sent to the College of Mount Saint Vincent community regarding COVID-19

CAPITAL DISTRICT

Schenectady High School:

How does 2019 Novel (New) Coronavirus spread?

Health experts believe the virus probably spreads from animals to humans and from person to person. It is not clear yet how easily the virus spreads from person to person.

The virus is not currently a concern for the general public and is not actively circulating among New Yorkers at this time. Therefore, there is no need to cancel school or social events. There is no need for students or school staff to wear surgical masks at school.

Prevention

There are currently no vaccines available to protect against this virus. The New York State Department of Health (NYDOH) recommends the following ways to minimize the spread of all respiratory viruses, including the coronavirus:

- Wash your hands often with soap and water for at least 20 seconds. Use an alcohol-based hand sanitizer that contains at least 60% alcohol if soap and water are not available.
- Avoid touching your eyes, nose and mouth with unwashed hands.
- Avoid close contact with people who are sick.
- Cover your mouth and nose with a tissue or your sleeve (not your hands) when coughing or sneezing. If you use a tissue, throw it in the trash.
- Routinely clean and disinfect frequently touched objects and surfaces.
- CDC recommends that travelers avoid all travel to China.

Important Health Information for Those Who Have Recently Traveled to Wuhan, Hubei Province, China and Experience Symptoms

If you recently traveled to Wuhan, China and feel sick with fever, cough or trouble breathing; OR you develop symptoms within 14 days of travel there, you should:

- Seek medical care right away. **Call ahead and tell them about your travel and symptoms**
- Avoid contact with others.
- Stay home, except for seeking medical care.
- Cover your mouth and nose with a tissue or your sleeve (not your hands) when coughing or sneezing.
- Wash hands often with soap and warm water for at least 20 seconds. If soap and water are not available, use an alcohol-based hand sanitizer that contains at least 60% alcohol.
- Contact your local health department

This is an emerging, rapidly changing situation. For questions, please contact your local department of health or the NYSDOH Novel Coronavirus hotline at 1-888-364-3065.

You can keep up to date about the virus, its treatment and prevention by visiting the following websites:

CDC's dedicated 2019-nCoV website at <https://www.cdc.gov/nCoV>.

NYDOH's dedicated 2019-nCoV website at

<https://www.health.ny.gov/diseases/communicable/coronavirus/>

NYSDOH directory of local health departments

https://www.health.ny.gov/contact/contact_information/

[New York State Center for School Health website atwww.schoolhealthny.com](http://www.schoolhealthny.com)

Sage College:

The College has brought together a team to review its pandemic protocols as part of our emergency operations planning efforts for the coronavirus and other virus-borne illnesses. We hope that these measures will not become necessary but we want to be prepared. The health and safety of our students is our utmost priority.

We are in regular contact with the New York State Department of Health, our local Health Departments, and are following all guidelines issued by them and the Centers for Disease Control.

In preparation for spring break travel, we strongly advise that members of the Sage community not travel to any country the CDC lists at a Warning Level 3 (currently Italy, South Korea, China or Iran). If any member of our community needs to travel to one of these countries, they must contact the Wellness Center for direction and guidance. Sage has no service trips planned to any areas currently at a Warning Level 3.

Individuals returning from a Warning Level 3 country will likely be subject to U.S. government health screening protocols upon arrival at major international airports in the United States.

Those returning from countries impacted by the coronavirus will be required to self-isolate for a minimum of 14 days and stay off campus. In addition, prior to returning to campus, individuals will need to provide clearance from your local health department to the Sage Wellness Center that they are symptom free and cleared to return to campus.

Given the prevalence of Influenza in our region and the need to prevent students who are ill from interacting in large groups, I strongly encourage students and faculty to work together to develop alternative plans to complete missed work. Students with the flu or flu-like symptoms should not come to class. Similarly, faculty, staff and administrators should consult with Human Resources regarding our sick leave policy and not come to work if they are experiencing the flu or flu-like symptoms.

Because the situation regarding the coronavirus and other illnesses is evolving daily, before you leave campus for spring break, we ask that you take any books, medications or other material you may need in case we need to develop alternative plans for class delivery. You should ensure that you have access to a computer and an internet connection in case alternative instruction becomes necessary.

We will continue to closely monitor this situation and provide updated information as it becomes available.

Skidmore:

Skidmore College has been monitoring the situation closely and, based on information from the CDC, Department of State, and our on-site partners, we have decided that we will not cancel programs or ask students to return home at this time. Additional decisions will be made as conditions warrant.

We have asked students in South Korea and Italy, where study abroad programs have been suspended and where the CDC has issued a Level 3 warning and for which the Department of State has issued a Level 4 Travel Advisory, to return to the U.S. We are working with students, their families and their programs to support the transition.

Students returning from South Korea and Italy

Most of the affected students have been offered the opportunity to complete their coursework and credits remotely, whether online from their homes or on the host program's U.S. campus. There are no plans to have these students return to Skidmore's campus to complete their coursework. We encourage students to take precautions and consider self-isolation for the recommended 14 days. During that period, to the extent possible, we told student that they should avoid crowded spaces and other public areas, including the Skidmore campus. Immediate actions for students studying abroad

1. As travel across the globe is becoming more restricted, we strongly urge you to remain in your host location and comply with any travel restrictions imposed by your program or your local government. These restrictions are serious and must be followed because there is a risk of being stopped while traveling or being stranded with no way to return to your host city. Always follow program protocols for your safety and well-being.
2. U.S. students should enroll in the U.S. Department of State Smart Traveler Enrollment Program ([S.T.E.P.](#)). Enrollment will allow embassies to provide information about safety conditions in your destination country, as well as contact you in an emergency. International students should use their home country's registry.
3. Before traveling or when looking for updates, refer to the following web sites for ongoing updates and precautions that will help you stay safe:
 1. [Centers for Disease Control and Prevention](#)
 2. [U.S. Department of State](#)
 3. [World Health Organization](#)
4. If you suspect you have been exposed to COVID-19 or you feel unwell, tell your program staff immediately. Each program location will have different protocols for treatment; follow your program's protocols carefully. You can also contact OCSE at ocse@skidmore.edu if you feel unwell.

If there are changes to your program, we will be in touch as soon as we have new information. Please check the Skidmore [webpage](#) for updates and links to helpful information.

Because the arrangements for each program are different, and students and families may have specific questions, we are addressing individual concerns on a case-by-case basis. Please do not hesitate to contact OCSE at ocse@skidmore.edu or 1-518-580-5355 with any questions or concerns.

Skidmore

With spring break approaching, we write to share an important message to help ensure the well-being of our students, faculty and staff.

In accordance with the Centers for Disease Control and Prevention (CDC) recommendations, and in collaboration with the Saratoga County Public Health Department and the New York State Department of Health, we recommend that community members carefully monitor travel advisories from the CDC and the U.S. Department of State before and during any planned travel for the upcoming spring break.

This is especially important because other countries and certain regions of the United States affected by COVID-19 could implement new travel restrictions at any time. Travel restrictions may be subject to change without notice and have the potential to interrupt or impede return travel.

At this time, there are no cases of COVID-19 at Skidmore College.

Community values and support

Skidmore is committed to maintaining an environment of respect and support for all members of our community affected by this situation.

We understand that this situation may be troubling to many in our community. If you are feeling anxious or worried because of the news about the COVID-19, we encourage you to use College resources. [Students may contact the Counseling Center](#). Employees may make use of the [Employee Assistance Program](#).

We encourage everyone to support each other, and play their part in fighting social stigma by [understanding and communicating the facts about COVID-19](#).

If you are planning to travel during the spring break, we urge you to exercise caution and to keep the following points in mind:

Travel guidance and precautions

- The CDC continues to advise against all nonessential travel to countries currently classified at a Level 3 warning: China, South Korea, Iran and Italy.
- Older adults and individuals with chronic medical issues are discouraged from traveling to Japan, which currently has a Level 2 warning. Other travelers to Japan are urged to practice enhanced precautions.
- While Skidmore is not currently implementing a ban on institutional travel internationally or domestically, we urge all travelers to take necessary safety precautions.
 - If you are making new plans for institutional travel, domestic or international, please confer with your vice president or division head for approval prior to booking.
 - Please consider traveling via airlines that allow refundable fares.
 - If travel is institutionally sponsored yet canceled by an individual on their own, travel expenses will not be refunded by the College.
- Travelers should check relevant websites frequently and respond accordingly. Before and during travel, refer to the following websites for ongoing updates and precautions:
 - [Centers for Disease Control and Prevention](#)
 - [U.S. Department of State](#)
 - [New York State Department of Health](#)
 - [World Health Organization](#)
- Anyone planning to travel abroad during spring break should enroll in the Department of State [Smart Traveler Enrollment Program \(STEP\)](#) program. International students should also consider enrolling in similar programs offered by their home country.
- Travel recommendations, screening procedures and restrictions about reentry into the U.S. may change rapidly. If you are planning to travel abroad, be prepared for potential delays when reentering the United States, and for the possibility of a quarantine at the border if you are returning from a country that has been identified with a high risk of COVID-19 by the CDC or the U.S. Department of State.
- Students living on campus who need to alter spring break travel plans because of these concerns can remain in campus housing during spring break, as long as they register with the [Office of Residential Life](#).

Guidance for return travelers

- [Consistent with U.S. Government recommendations](#), any Skidmore community member (students, faculty or staff) returning from mainland China, Iran, Italy, South Korea, or other CDC Level 3 Travel Warning location should self-isolate for 14 days after returning and must not return to Skidmore's campus until that period is complete.
- Skidmore continues to follow all CDC, Department of State and Department of Health guidelines and continues to work closely with travel abroad host institutions to help students during this transition.
- As students return from study abroad programs, they are strongly encouraged to return to their home where they should self-isolate for 14 days after returning. Students must not return to Skidmore's campus until that period is complete.

Human Resources guidelines

As a community, we have a shared interest in the health and safety of all of our community members including faculty, staff, students and visitors.

- Therefore, faculty and staff who plan to travel to a country or area that is designated as a CDC Level 3 warning location should notify the Office of Human Resources and their supervisor of their travel plans.
- Human Resources will work with supervisors to make appropriate telecommuting arrangements for employees in self-isolation, if possible.
- Consistent with College practice related to absences of similar duration, employees who utilize sick time for self-isolation may be required to present a return to work notice from a health care provider before returning to campus.

Symptoms

Any student with the following symptoms should seek screening at Health Services by calling 518-580-5550. Faculty and staff should call their primary care provider. Some of the most common symptoms include:

- Fever
- Shortness of breath
- Cough

Illness prevention

Everyday preventive actions can help slow the spread of germs that cause many different illnesses. We recommend these precautions:

- Wash hands frequently with soap and hot water. Hand-washing posters are located throughout campus.
- Wipe down frequently touched or shared surfaces (such as doorknobs, tables, counters, faucets, etc.) after each use with a disinfectant wipe.

- Cover nose and mouth when coughing or sneezing using your sleeve (the crook of your elbow) or a tissue, not your hands.
- Avoid sharing food and drinks, cups, utensils, water bottles, etc.
- If you share living spaces, try to stay at least 6 feet away from others to prevent exposure.
- Alcohol-based hand sanitizers are located throughout the campus. Put enough product on hands to cover all surfaces. Rub hands together until they feel dry. This should take about 20 seconds. Do not rinse or wipe off the hand sanitizer before it is dry; it may not work as well against germs.

We will provide additional updates as they become available. Please continue to check the [Skidmore COVID-19 webpage](#) for links to resources and helpful information. For specific questions, please reach out to the appropriate [campus contact listed online](#).

Michael Orr

Dean of the Faculty and Vice President for Academic Affairs

Cerri Banks

Dean of Students and Vice President for Student Affairs

Lansingburgh:

Based on current information, the immediate health risk to our school district is low. We are closely monitoring this ongoing situation and following guidance from the Centers for Disease Control (CDC), the New York State Department of Health (NYSDOH), the New York State Education Department (NYSED) and the Rensselaer County Health Department. Should the situation in our school district change, we will be in contact with you again as soon as possible. Our schools are taking the same preventative measures as during cold/flu seasons, including regularly disinfecting surfaces and frequently reminding students and staff to wash their hands often. As always, we urge you to keep your children home from school if they are sick (you can refer to our [“When Students Should Stay Home from School” online guide](#)) and contact your medical provider immediately if your child is seriously ill.

The following are NYSDOH suggestions for minimizing the spread of all respiratory viruses, including the coronavirus:

- Wash your hands often, for at least 20 seconds, with soap and water
- Use at least 60% alcohol-based hand sanitizer if soap and water are unavailable
- Avoid touching your eyes, nose, and mouth with unwashed hands.
- Avoid close contact with those you know are sick
- Stay home if you or your child feels sick.
- Cover your mouth/nose with a tissue or your sleeve (not your hands) when coughing or sneezing. If you use a tissue, immediately throw it away.
- Regularly clean and disinfect frequently touched objects and surfaces.

If interested in reading more about the coronavirus, we recommend looking to official sources such as the CDC (www.cdc.gov) or NYSDOH (www.health.ny.gov or call 1-888-364-3065 for their coronavirus hotline).

Thank you for your help keeping our students, staff and school community safe.

Sincerely,
Dr. Antonio W. Abitabile, Ed.D.
Superintendent of Schools

Union:

The Union College Coronavirus Task Force continues to assess the rapidly changing status of the COVID-19 outbreak. We understand that there are many rumors spreading across campus, which is understandable given that external conditions are changing rapidly, and much has yet to be decided. This is an unprecedented situation. We are meeting daily, considering options, and preparing for all likely contingencies. Our dual goals continue to be to keep our community safe, and to pursue our core mission.

Highlights

- Our current plan is to hold face-to-face classes and final exams as planned for the remainder of winter term. Any decision to begin spring term with any changes including possible online instruction will be announced by 3/12, so that all community members can plan accordingly before the winter term ends.
- We need your assistance so that we will be ready should online classes be necessary. We ask that all students, faculty and staff fill out this [form](#) about your travel plans and internet access from home.
- It is not uncommon for there to be misinformation being shared by people on campus. All decisions we make will be posted at www.union.edu/coronavirus. Students, faculty, and staff will receive concurrent notification.
- *If you have symptoms consistent with coronavirus, please call Wicker Wellness Center (518) 388-6120 or your healthcare provider, before seeking in-person care.*

New Travel Advisories

We request that everyone fill out [this form](#) regarding their planned travel over spring break. Based on new guidance from the Centers for Disease Control, Union College is taking the following new actions:

- Asking all faculty, staff and students to [defer cruise ship travel](#).
- All faculty, staff and students are asked to cancel or postpone all unnecessary travel on behalf of the College.

Students - If you are traveling to a level 3 country please contact student affairs at cvtravel@union.edu for guidance for returning to campus.

Faculty and staff - if you are traveling to a level 3 country, please contact Human Resources at hr@union.edu for guidance for returning to campus.

Until further notice, no College-sponsored/funded travel to a level-3 country is permitted.

College-sponsored travel to level-2 countries affected by coronavirus will be considered on a case-by-case basis by the vice president of the relevant unit.

Health Services

We would like to remind everyone that if you are experiencing symptoms consistent with coronavirus (fever, cough, shortness of breath) you should stay home or in your residence.

Students: please contact health services by phone. Do not go to the health center without

calling first. Faculty and staff should contact your primary care physician. Many local physicians are requesting that you call before visiting their clinic or office.

The following guidance was previously shared with campus over the past week:

Community members should follow the illness prevention guidelines detailed at the end of this message. In addition, we are recommending that community members practice social distancing, which includes:

- Avoiding unnecessary physical contact (handshakes, hugs, etc.)
- Staying home or in your residence if you are sick
- Reducing participation in discretionary group activities (especially those greater than 50 people)

Foreign Travel Guidance

Union College is requesting that members of our community avoid travel to countries that have been given a level 2 (currently Japan) or 3 (currently China, South Korea, Italy, Iran) travel advisory by the [CDC](#). These advisories change frequently, so please check the CDC site before making final travel plans, and before traveling.

Per CDC guidance, any community member who does travel to a level 3 country (including airport layovers) will be expected to self-quarantine away from campus for a 14-day period after returning to the United States and will not be permitted on campus during that time. Academic accommodation of any resulting student absences from classes is not guaranteed and is up to the discretion of their faculty. Any students finding themselves in such a situation should contact the Office of the Dean of Students and their individual professors immediately.

All students currently studying away have been offered the opportunity to return to the United States early without academic penalty. Those students who choose to return early will not be returning to campus until after the spring break.

Domestic Travel

The situation in the United States is changing rapidly. While there are currently no restrictions on domestic travel, we encourage all community members to stay abreast of conditions in their destinations and take all recommended precautions to avoid contracting and spreading the virus.

Important Health and Safety Information

ILLNESS PREVENTION

There is currently no vaccine to prevent coronavirus disease 2019 (COVID-19). The best way to prevent illness is to avoid being exposed to this virus. However, as a reminder, CDC always recommends everyday preventive actions to help prevent the spread of respiratory diseases, including:

- Avoid close contact with people who are sick.
- Avoid touching your eyes, nose, and mouth.
- Stay home when you are sick.
- Cover your cough or sneeze with a tissue, then throw the tissue in the trash.
- Clean and disinfect frequently touched objects and surfaces using a regular household cleaning spray or wipe.

- [Wash your hands often with soap and water](#) for at least 20 seconds, especially after going to the bathroom; before eating; and after blowing your nose, coughing, or sneezing.

Students - If you have symptoms please contact [Health Services](#) at (518) 388-6120 or your primary care physician. For general questions about the coronavirus please contact the [New York State Department of Health](#).

Employees –If you have symptoms please contact your primary care physician. For general questions about the coronavirus please contact the [New York State Department of Health](#).

SUPPORT SERVICES

We understand that this situation may be troubling to many in our community. The [Counseling Center](#) ((518) 388-6161) is available to students who are looking for support at this time. Faculty and staff can access resources through the [employee assistance plan](#).

This is a rapidly developing situation. We will continue to monitor the status and update campus on any developments. Please continue to take all recommended precautionary measures.

Utica College

As of this writing, there are no confirmed or presumptive cases of coronavirus among the Utica College community.

Nevertheless, on the latest recommendation and guidance of the U.S. Department of State, Centers for Disease Control and Prevention (CDC), World Health Organization (WHO), New York State and Florida Departments of Health, and Oneida County Department of Health, the College is implementing the following precautionary and preventative measures, effective immediately.

- All residence halls will remain open throughout spring break, and dining options will be made available, for any students who are concerned about traveling home. Students who are interested in remaining on campus during spring break, should notify the Office of Student Life and College Engagement by completing the following form: <https://forms.gle/zY6czqQj33dcz7pV6>. If you have already received permission from SLCE, or if you are a member of an in-season athletics team, you do not need to complete this form.
- The College is evaluating on a case-by-case basis all College-sponsored travel, including spring break trips. Decisions will be communicated directly to the advisors of affected groups. An important reminder: all students, faculty, and staff embarking on College-sponsored travel are required to notify the College in advance of the trip by e-mailing emermgt@utica.edu.
- So that the College can monitor travel for potential exposure to the virus and reduce the exposure risk to the UC community, we are requiring all students, faculty, and staff traveling during spring break to complete a travel survey. A link to the survey is available at the top of this page [and here](#). Anyone planning to travel should monitor travel restrictions as they are fluid and subject to change.

Additionally, the following measures, which were previously communicated, remain in effect.

- All College-sponsored travel to the countries on the CDC's list of countries impacted by a coronavirus outbreak (*China, Iran, Italy, Japan, and South Korea*) is suspended until further notice. Faculty who have a compelling and urgent need to travel internationally, regardless of destination, are required to inform the Provost. Students and staff who have a compelling and urgent need to travel internationally should e-mail emermgt@utica.edu. Those who intend on traveling overseas should be aware that they may be subject to government quarantine upon returning to the United States.
- Our study abroad program in Italy is suspended. The two UC students studying in Florence, Italy have safely returned to the U.S. They have not displayed any symptoms of the coronavirus, and they are home with their families while completing the CDC advised 14-day symptom-monitoring period. The College does not currently have any students, faculty, or staff in the other countries on the CDC's advisory list. We have developed plans, should they be needed, for other countries or regions in which UC students are currently studying that are not on the CDC advisory list.
- The Provost's office is evaluating upcoming international and domestic field experiences in regards to associated government warnings and restrictions.
- The College is requiring that any employee experiencing symptoms of acute respiratory illness (*e.g. fever, difficulty breathing, persistent cough*) refrain from coming to work until the symptoms have resolved. Supervisors are asked to send employees home if they are exhibiting symptoms. Any questions regarding use, availability, and documentation of leave time should be directed to the Office of Human Resources.
- Students who are experiencing any of these symptoms should refrain from attending class, limit their contact with others, and contact the Student Health Center and/or visit their primary care provider or urgent care center.
- Regardless of travel, everyone is reminded to practice personal preventative health measures. These measure include washing your hands frequently and meticulously; avoiding touching your eyes, nose, and mouth with unwashed hands; avoiding contact with anyone with cold or flu-like symptoms; and covering your nose and mouth with a tissue when coughing or sneezing (*or an elbow or shoulder if no tissue is available*).

There is, understandably, a high level of concern and uncertainty around this fluid and rapidly evolving situation. Beyond the measures we have already taken, the Campus Emergency Management Team (CEMT), working in close consultation and coordination with state and local public health agencies as well as the infectious disease experts on our own campus, are actively developing additional protocols and contingency plans in the event of a larger-scale threat to our community.

As we continue to monitor the latest developments, I encourage everyone to regularly consult the CDC website (cdc.gov) for updates and important information and visit this page for updates regarding the College's protocols and travel restrictions.

MD Sports Hall

With the growing public health concern about the Novel Coronavirus (COVID-19), we want to assure you that our main concern is for the health and safety of all organizations, players, parents, and families using our facility. We are monitoring The Centers for Disease Control and Prevention (CDC) guidelines to ensure we are following all protocol and prevention recommendations regarding Coronavirus.

Those recommendations are:

- Stay home when sick
- If you have traveled to a known Coronavirus outbreak area, stay home to monitor your health for 14 days upon return.
- Use good hand washing habits (soap and water for 20 seconds or more)

At MD Sports Hall, we are:

- Cleaning and disinfecting all surfaces with increased effort and frequency
- Ensuring anti-bacterial agents are available for participant use as needed
- Encouraging frequent hand-washing
- Ensuring users to remain home if they are sick

Please help us by:

- Staying home if you or your child are sick
- Washing and sanitizing your hands before and after entering the gym
- Covering your cough or sneeze with a tissue or your elbow, and disposing of tissues immediately
- Refraining from touching your eyes, nose, and mouth with unwashed hands

PENNSYLVANIA

Spooky Nook:

As always, the safety and security of our guests is the absolute priority at The Nook.

We're looking forward to hosting your event in the coming weeks and want you to know our team is monitoring the situation with COVID-19. While we always increase our regular cleaning schedules during this time of year, we have taken even more steps in our heavily used areas.

We will continue to monitor new information surrounding COVID-19, as well as our own upcoming tournaments and from where these attendees are travelling.

For additional information, we are using resources at the following links for daily updates:

- [Centers for Disease Control and Prevention](#)
- [PA Department of Health](#)

If you have any other questions, please let me know!

United Sports Center:

We are putting into place extra cleaning protocols. We will be cleaning bathrooms, counter tops, door handles, and other high traffic areas more frequently. We are looking to add staff onsite to help with the cleaning. We are asking families that might have any flu symptoms to stay home. We have instructed our tournaments to forgo hand shaking for the time being until otherwise mentioned. We are doing our best to stay on top of things.

Brandywine Youth Center:

The following measures will be taken at our facility. We are cleaning each day during the tournament and have a porter all day on the weekends helping to keep everything clean. Hand sanitizer is available in bathrooms and entryway. We also ask you to assist, by making sure you do not have any sick players or relatives coming to the facility. Please instruct ALL the teams to keep ANY sick player, coach or parent out of the tournament.

The Phelps School

Coronavirus Precautions

This note is to assure our school family of the measures in place for student well-being. This morning, the Center for Disease Control raised the coronavirus threat level and is now recommending that travelers avoid all nonessential travel to China. We are encouraging our Chinese students to remain in the US and Canada during Spring Break in March.

We will remain on high alert for any signs of acute upper respiratory illness, particularly among students who cannot avoid airline travel. Any airline travelers who present signs of febrile illness will be directed to the local hospital Emergency Room for lab testing.

Prevention - The CDC always recommends these measures to help prevent the spread of respiratory viruses:

- Wash your hands often with soap and water for at least 20 seconds. If soap and water are not available, use an alcohol-based hand sanitizer.
- Avoid touching your eyes, nose, and mouth with unwashed hands.
- Avoid close contact with people who are sick.
- Stay home when you are sick.
- Cover your cough or sneeze with a tissue, then throw the tissue in the trash.
- Clean and disinfect frequently touched objects and surfaces.

CDC offers [specific guidance for travelers](#). CDC Control and Prevention 1/27/2020 10:14 AM EST

Please feel free to contact us here at school if you have any questions or concerns.

Sportsplex at Warminster

We will have more hand sanitizer bottles and Clorox wipes available upon request at the front counter. We are also sanitizing the bathrooms, bleachers, and any equipment that is used every day. Lastly, we are encouraging staff to stay home if they are feeling sick.

MARYLAND

The Park School

We continue to monitor the latest developments regarding the coronavirus. Here at school, we have implemented a number of steps dedicated to keeping our school community healthy,

limiting the potential transmission of COVID-19 and other viruses, and educating our student body with the best, age-appropriate information available. These steps include:

- Increased frequency of and scope of disinfecting surfaces (tabletops, door handles, light switches, etc.)
- Increased availability of hand sanitizers and disinfecting wipes
- Community discussions (in assembly, House, advisory, or homeroom) regarding best practices for limiting transmission of viruses
- heeding the recommendation of the U.S. Centers for Disease Control (CDC) and government officials for schools to be prepared for the possibility of this virus becoming more widespread. The principals, faculty, and administrators are meeting regularly — both in-person and online — to consider the full range of implications of COVID-19 directly affecting members of the Park community."

Lastly, I will reiterate the importance of adopting the following practices that prevent the spread of respiratory viruses:

- Avoid close contact with people who are sick.
- Avoid touching your eyes, nose, and mouth.
- Stay home when you are sick.
- Cover your cough or sneeze with a tissue, then throw the tissue in the trash.
- Wash your hands often with soap and water for at least 20 seconds, especially after going to the bathroom; before eating; and after blowing your nose, coughing, or sneezing.
- Take some time to continue to reinforce these simple messages at home, and please know how much we appreciate your partnership as we work together to keep your children healthy and thriving

ATHLETIC REPUBLIC

We know there are a lot of concerns around the ongoing coronavirus epidemic; along with you, we are closely following the news for updates.

We want to assure you that we are taking precautionary steps to provide the safest environment we can for our athletes. We're wiping down equipment, weights, and other surfaces frequently. We also are increasing the frequency of cleanings throughout the building. In addition, we also are asking that all trainers and athletes wash their hands and/or use the hand sanitizer at the front desk both before and after sessions. According to all research and messaging from organizations like the CDC, this is the single most important step to preventing illness of any kind.

Above all, we ask that if you aren't feeling well, please stay home from your session, both for your own well-being and that of your fellow athletes and trainers.

Thank you! Together, we can keep our community safe and healthy!

CONNECTICUT

INSPORTS CENTERS

All of us at Insports are, of course, concerned about what "Coronavirus Disease 2019" (COVID-19) will mean for each of us, our families, players, coaches and staff. I have been meeting with the Insports management team and we have been reviewing best practices and the most

current procedures recommended by the CDC for the prevention of COVID-19. I have also met with our food service team, who are all Serve Safe certified to go over best practices and enhanced cleaning policies.

Insports will continue with normally scheduled activities but are prepared to modify, postpone and/or cancel activities if and when necessary, We are actively monitoring the situation and want to assure everyone that we are following all town, state and federal (CDC) guidelines as it pertains to the virus. In the meantime, we are asking families, coaches and players to apply a common sense approach towards participation in group activities at Insports and elsewhere.

First and foremost, if anyone in your household is sick, please stay home. Second, please familiarize yourself and your children with the preventative guidelines for the COVID-19 virus from the CT Department of Health (www.ct.gov/Coronavirus) including:

- Wash your hands often with soap and water for at least 20 seconds. If soap and water are not available, use an alcohol-based hand sanitizer with at least 60% alcohol content.
- Avoid touching your eyes, nose, and mouth with unwashed hands.
- Teach children to cover coughs or sneezes with a tissue, then throw the tissue in the trash.
- Clean and disinfect frequently touched objects and surfaces.
- Avoid close contact with people who are sick.

- Additional Recommended Prevention Measures InSports Is Taking:
 - For everyone's benefit, our maintenance crew have increased their cleaning and sanitizing efforts throughout our facilities with the goal of being as proactive as possible.
 - We are posting CDC Notices throughout the building reminder our customer of the importance of washing hands.
 - We are asking any family members who aren't feeling well or are at HIGH RISK to stay home, we are providing FREE LIVE BARN internet access this weekend, so you can watch all the action from home and won't miss one minute of the action.
 - We are asking team coaches and representatives to emphasize good habits and precautionary measures with their players during practices and team activities.
 - We are asking that teams bump elbows instead of shaking hands after games.

VIRGINIA

RockIt Sports

We have since reiterated the importance of preventing the spread of bacteria and illnesses; urging employees/athletes to stay home if they're experiencing any onset symptoms. We have also increased signage around our facility for vigilant infection prevention, such as hand hygiene and cough etiquette. On top of our general facility upkeep and routine cleaning of commonly touched surfaces, equipment, and other shared objects; we have increased our supplies of disinfectants in order to sterilize our equipment before and after each tournament. We will continue to follow general prevention practices according the CDC's website and should our protocol change, we will ensure you guys receive an update.

FLORIDA

IMG ACADEMY

Here at the Academy we are continuously monitoring the Coronavirus (COVID-19) and are mirroring our policies based on the recommendations by the Center for Disease Prevention and Control (CDC) and are working closely with local health officials and our on-campus partner Johns Hopkins All Children's.

At this time, anyone traveling to the following countries, will not be permitted on campus until they are able to demonstrate that they have been away from the impacted country and symptom-free for a period of 14 days after returning to the U.S.: China, South Korea, Hong Kong, Japan, Taiwan, Thailand, Singapore, Italy and Iran. This includes any contact with a family member or someone you have had close contact with that has traveled to these locations. This is our current policy for all staff, students, campus visitors and anyone else that may be coming on campus for the foreseeable future. We wanted to make sure you were aware of this policy before coming on campus.

NORTH CAROLINA

ROCKY MOUNT EVENT CENTER

Prevention plan advised by the CDC

- Actively encourage sick employees to stay home:
 - o Employees who have symptoms of acute respiratory illness are recommended to stay home and not come to work until they are free of fever (100.4° F [37.8° C] or greater using an oral thermometer), signs of a fever, and any other symptoms for at least 24 hours, without the use of fever-reducing or other symptom-altering medicines (e.g. cough suppressants). Employees should notify their supervisor and stay home if they are sick.
 - o Ensure that your sick leave policies are flexible and consistent with public health guidance and that employees are aware of these policies.
 - o Talk with companies that provide your business with contract or temporary employees about the importance of sick employees staying home and encourage them to develop non-punitive leave policies.
 - o Do not require a healthcare provider's note for employees who are sick with acute respiratory illness to validate their illness or to return to work, as healthcare provider offices and medical facilities may be extremely busy and not able to provide such documentation in a timely way.
 - o Employers should maintain flexible policies that permit employees to stay home to care for a sick family member. Employers should be aware that more employees may need to stay at home to care for sick children or other sick family members than is usual.
- Separate sick employees:
 - o CDC recommends that employees who appear to have acute respiratory illness symptoms (i.e. cough, shortness of breath) upon arrival to work or become sick during the day should be separated from other employees and be sent home immediately. Sick employees should cover their noses and mouths with a tissue when coughing or sneezing (or an elbow or shoulder if no tissue is available).
- Emphasize staying home when sick, respiratory etiquette and hand hygiene by all employees:
 - o Place posters that encourage staying home when sick, cough and sneeze etiquette, and hand hygiene at the entrance to your workplace and in other workplace areas where they are likely to be seen.
 - o Provide tissues and no-touch disposal receptacles for use by employees.

- o Instruct employees to clean their hands often with an alcohol-based hand sanitizer that contains at least 60-95% alcohol or wash their hands with soap and water for at least 20 seconds. Soap and water should be used preferentially if hands are visibly dirty.

- o Provide soap and water and alcohol-based hand rubs in the workplace. Ensure that adequate supplies are maintained. Place hand rubs in multiple locations or in conference rooms to encourage hand hygiene.

- o Visit the coughing and sneezing etiquette and clean hands webpage for more information.

- Perform routine environmental cleaning: o Routinely clean all frequently touched surfaces in the workplace, such as workstations, countertops, and doorknobs. Use the cleaning agents that are usually used in these areas and follow the directions on the label.

- o No additional disinfection beyond routine cleaning is recommended at this time.

- o Provide disposable wipes so that commonly used surfaces (for example, doorknobs, keyboards, remote controls, desks) can be wiped down by employees before each use.

- Advise employees before traveling to take certain steps:

- o Check the CDC's Traveler's Health Notices for the latest guidance and recommendations for each country to which you will travel. Specific travel information for travelers going to and returning from China, and information for aircrew, can be found at on the CDC website.

- o Advise employees to check themselves for symptoms of acute respiratory illness before starting travel and notify their supervisor and stay home if they are sick.

- o Ensure employees who become sick while traveling or on temporary assignment understand that they should notify their supervisor and should promptly call a healthcare provider for advice if needed.

- o If outside the United States, sick employees should follow your company's policy for obtaining medical care or contact a healthcare provider or overseas medical assistance company to assist them with finding an appropriate healthcare provider in that country. A U.S. consular officer can help locate healthcare services. However, U.S. embassies, consulates, and military facilities do not have the legal authority, capability, and resources to evacuate or give medicines, vaccines, or medical care to private U.S. citizens overseas.

- Additional Measures in Response to Currently Occurring Sporadic Importations of the COVID-19:

- o Employees who are well but who have a sick family member at home with COVID-19 should notify their supervisor and refer to CDC guidance for how to conduct a risk assessment of their potential exposure.

- o If an employee is confirmed to have COVID-19, employers should inform fellow employees of their possible exposure to COVID-19 in the workplace but maintain confidentiality as required by the Americans with Disabilities Act (ADA). Employees exposed to a co-worker with confirmed COVID-19 should refer to CDC guidance for how to conduct a risk assessment of their potential exposure.

Updates are available on CDC's web page at www.cdc.gov/coronavirus/covid19 and for more information visit their website.

MIDWEST

TBK Sports Complex

IMPORTANT UPDATE - COVID-19 TBK Bank Sports Complex wants to assure the community that we take the health, safety, and well-being of our event participants, attendees, and staff very seriously.

There is no higher priority to the entire TBK Bank Sports Complex than the Safety and Security of our Guests and Employees. We are closely monitoring all information presented by the Centers for Disease Control (CDC), the National Institutes of Health (NIH), the World Health Organization (WHO), and government agencies to stay on top of this evolving situation. According to the most recent information from the CDC, for most people, the immediate risk of being exposed to the virus that causes COVID-19 is thought to be low and should take the same basic precautions to prevent the spread of the virus as the common cold.

However, we at TBK Bank Sports Complex acknowledge the potential concerns of our Guests regarding the spread of COVID-19 and other communicable viruses in any public area.

Currently all practices, games, and tournaments will proceed as scheduled. TBK Bank Sports Complex implements active prevention as its safety, security, and cleanliness.

Precaution is the best policy; we recommend following common sense steps to help prevent the spread of any respiratory virus.

Helpful and Healthy Tips:

- Wash your hands often with soap and water for at least 20 seconds
- Avoid close contact with people that are sick
- Avoid touching your eyes, nose, and mouth
- Cover you cough or sneeze with a tissue. Throw away your tissues.
- Clean and disinfect frequently touched objects and use wipes and cleaning sprays
- Do not refill drinks from a cup you have been drinking from and avoid using utensils that others have used
- Do not share water bottles and towels
- Do not wear a face mask if you are well

As TBK Bank Sports Complex continues to track developments, we will re-evaluate our policies and implement new procedures as circumstances change. Please be assured our focus is on the health and safety of our event participants, attendees, and staff.

For additional information and FAQs on the Coronavirus, visit the CDC website. If you have any other questions, please call us at 563.723.7529.
